Summary

Passionate Flutter developer with hands-on experience in building cross-platform apps. Skilled in state management, clean architecture, and API integration. Eager to grow and contribute to real-world solutions.

Experience

Trainee-Digital Egypt Pioneers Initiative (DEPI)

11/2024 – 05/2025

Contributed to the development of a Striky fitness app 🔗 in collaboration with a team as part of the graduation project from the initiative.

- Gained knowledge in mobile application development using Android alongside Flutter.
- Studied Business English, freelancing, and soft skills to enhance communication and career development.

Flutter Developer Trainee – Information Technology Institute (ITI)

06/2024 – 07/2024

Flutter Mobile App Development Training

Completed an intensive 120-hour training on cross-platform mobile development using Flutter.

- Experienced in developing responsive UIs and managing application state using state management.

Projects

Quick Mart – E-Commerce App 🔗

12/2025 – 02/2026

Quick Mart – A modern e-commerce app built with Flutter.

- Clean architecture with DI via GetIt, functional programming with Dartz, and Offline caching with Hive.
- Features secure authentication (Multi-language support with RTL, shopping cart management, product browsing & filtering, and address management).
- Uses BLoC/Cubit for state management with Hydrated BLoC for persistence.
- Backend powered by Firebase (Auth, Firestore)

Dr Chat – Therapist Chatbot 🔗

03/2025 – 06/2025

A therapist chatbot that allows users to share their mental health concerns and receive support and guidance.

- Implemented MVVM architecture and used GetIt for dependency injection.
- Secure authentication (Email/Password, Google), guest mode, and profile management using Firebase.
- Chat history and user data are stored with Firestore for persistence and offline access.
- Features a clean modern UI with multi-language support, dark/light mode, with Shared Preferences and state management using Bloc/Cubit.

DayTask – Task Management App 🔗

07/2025 – 10/2025

A complete work environment in a single platform - Productivity application for team collaboration and task management.

- Built task scheduling, progress tracking, and team collaboration features.
- Implemented real-time chat and notifications to improve communication.
- Integrated Firebase Authentication, Firestore, and Hive with state management using Bloc/Cubit and Provider.

Education

Fayoum University

Bachelor's degree in Computer Science

2021 – 2025 | Fayoum, Egypt

Skills

Dart | C++ | OOP | Data Structures | Algorithms | Flutter | Bloc | Cubit | Provider | MVVM |
SOLID principles | Clean Architecture | RESTful APIs | Hive | Shared preferences | Firebase
Authentication | Firestore | Responsive UI | Git - GitHub | Dependency Injection |

Languages

Arabic - Native

English - B1 Intermediate
